PROFESSIONAL SUMMARY

Detail-oriented and analytical Data Analyst with hands-on experience in Python, SQL, and data visualization tools. Skilled in transforming raw data into actionable insights to support business decision-making. Adept at statistical analysis, data cleaning, and dashboard creation. Eager to contribute to data-driven projects in a collaborative environment.

EXPERIENCE

Research Technologist (Data Focus)

November 2024 - Current

Diagnostica Stago, Parsippany, NJ

- Designed 12 protocols that outline both the research approach and data analytical approach for specific studies
- Analyzed clinical data using linear regression, ad-hoc testing, and hypothesis testing to promote 3 new products
- Improved efficiency and report aesthetics by converting 5 clinical reporting using Excel to R Software
- Guided the development of a new non-technical backgrounded staff member to 5 or more new statistical methods

Data Analyst

March 2023 – August 2024

Allegheny Health Network, Pittsburgh, PA (Remote)

- Created 5 Tableau dashboards that aided in the periodic workflow for clinical staff members improving workflow
- Authored 15 data reports using SQL and Excel that guided staff in determining best client location and insurances
- Achieved 95% scoring on high competitive Epic SQL database and dashboard examinations

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn), R (basic)
- **Databases:** SQL (PostgreSQL, MySQL), Excel (PivotTables, VLOOKUP)
- **Visualization:** Power BI, Tableau, Google Data Studio
- **Statistics:** Hypothesis testing, regression analysis, chi-square tests
- **Tools:** Jupyter Notebook, Git, Microsoft Office Suite

EDUCATION

Masters in Science in Data Analytics

June 2021 – August 2022

Eastern University, Wayne, PA

Relevant Coursework: Statistical Methods, Data Mining, Database Management, Machine Learning - 4.00 GPA

Bachelor's in Science in Medical Technology

July 2007 – May 2009

University of Buffalo, Buffalo, NY

Relevant Coursework: Analytical Methods, Statistics, Emphasis on Analytics in Clinical Settings – 3.67 GPA

PROJECTS

Emergency Department Dashboard

August 2024 – October 2024

- Built a dynamic dashboard in Tableau to track 12 key metrics used to improved clinical outcomes
- Used SQL to query and join multiple tables from mock data using Python to create 1,000,000 rows (big data)

<https://github.com/RyansStacks/Emergency-Department-Tableau-Dashboard>

White Blood Cell Image Cancer Predictor

July 2023– August 2023

- Created a Keras *Neural Network* (CNN) that inputs .png images and provides %98 classification of cell type
- Demonstrated ability to process more advanced data types such as 28 x 28 .png files using Python Pandas
